

Copper Material

1. Copper Bus Bar

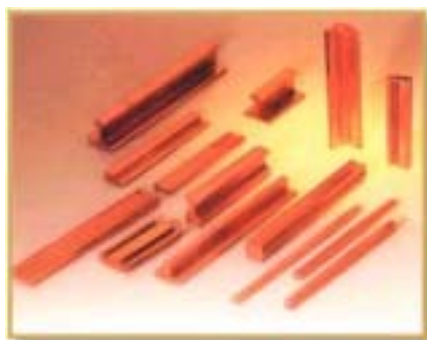

- High quality of Conductivity, chemical composition
- use : High capacity electrical main lines, distributor

2. Copper Rods/ Round Bars

- High quality of conductivity and Heat radiation with high anticorrosion
- use : Electrical parts for chemical industries

3. Deformed Profiles & Ground Rods

- Trolley bars, I-beam, Angle, channel and etc.
- Deformed Bus bars

4. Copper Sheets/ Strips

- Conductivity 98% above and excellent welding performance
- use : Electrical parts, welding rods, chemical industries construction materials, roof materials joint bars
